Davanagere, Karnataka, India

PROFESSIONAL SUMMARY

Final-year Computer Science student at GM Institute of Technology and freelance full-stack developer. I specialize in building scalable, user-centric web and Web3 applications using the MERN stack, Java, and blockchain technologies. Campus tech leader driven by first-principles engineering and continuous learning.

EDUCATION

G M Institute of Technology, Davanagere — *Bachelor of Engineering — Computer Science*
Expected June 2027 — CGPA: 8.3/10

RTES PU College, Ranebennur — *Pre-University — Science*
March 2023 — Score: 92%

Government High School, Hulikatti — *Secondary School Certificate (SSLC)*
July 2021 — Score: 98%

TECHNICAL SKILLS

Languages & Core CS: JavaScript (ES6+), Java, Python, Solidity, DSA
Full-Stack (MERN): React.js, Node.js, Express.js, Spring Boot, MongoDB, Mongoose, REST APIs, JWT, Axios, Multer
Cloud, Tools & UI/UX: Vercel, Render, Cloudinary, CI/CD, Git/GitHub, Postman, Tailwind CSS, Figma,Canva
Blockchain & Web3: Ethereum, Hedera, Hardhat, Ethers.js, Web3.js, MetaMask, IPFS

PROFESSIONAL EXPERIENCE

Software Developer — GMIT CSE Department — *January 2026 – Present*
Tech Stack: MERN Stack, Gemini API, Database Design
- Developed departmental academic platforms serving 500+ users, reducing administrative overhead by 60% through Gemini API automation.

Freelance Full-Stack Developer — *January 2026 – Present*
Tech Stack: React.js, Node.js, MongoDB, Express.js, REST APIs, Cloud Services
- Deployed 5+ full-stack web applications featuring secure authentication and optimized database queries%.

Lead Organizer & Platform Developer — Interconnect 26.0 — *April 2026*
Tech Stack: MERN Stack, Event Management, Deployment
- Built and deployed the official GSoC-style platform InterConnect 26.0 supporting 200+ concurrent users with 100% uptime for real-time project management and submissions.

MAJOR PROJECTS

PDMS — AI-Integrated Program Curriculum Management System — *January 2026 – Present*
Tech Stack: MERN Stack, Gemini API, Python, Version Control
- Developed an AI-integrated curriculum management system with Gemini API, Python PDF parsing, schema-based processing, and curriculum version control.

GMU-CSE Department Community Platform — *2025*
Tech Stack: MERN Stack, Context API, Cloudinary, MongoDB, Responsive Design
- Deployed an institutional web platform with an administrative dashboard consolidating faculty directories, placement records, and alumni networks.

TejasDairy — Dairy Management System (Freelance Project) — *April 2026*
Tech Stack: MERN Stack, Tailwind CSS
- Built a full-stack dairy management platform featuring real-time inventory tracking and automated billing cycles.

Influancaa — AI-Powered Influencer–Brand Matchmaking Platform — *2025*
Tech Stack: MERN Stack, Social Media Integration, JWT Authentication, MongoDB, Razorpay Escrow Integration
- Built an AI-powered platform with influencer–brand matchmaking, campaign management, social media tracking, and secure Razorpay escrow payments.
